**Here's what former parents are saying:**

*Our youngest daughter applied to 4 colleges and was accepted to all of them. She was also accepted for the honors program for most of her colleges and received scholarships. We are most grateful for this bootcamp and all the help and encouragement we could not have done it without this bootcamp!!

*We told other families about the College Application Bootcamp and they were able to get a group of students to work over the summer on their essays. By the time they returned to school in the fall for their senior year, their essays were completed and they had finished their common application. This allowed them to apply early action on time and then to apply to the honors program for a few of the colleges.
